TCS CORE COMPETENCIES

Philosophy and Stance sit firmly at the heart of the wheel. Like yin and yang, they are complementary forces that interact as a dynamic system – a team coach's mindset - in which the whole is greater than the assembled parts.

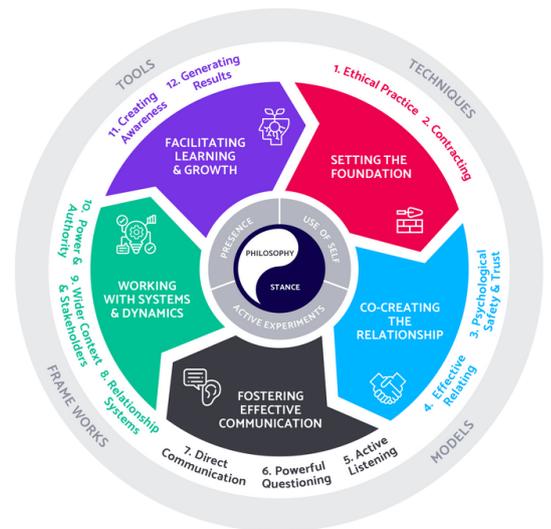

A coach's mindset informs a coach's way of being and every single intervention; it is what makes the difference between an OK coach and coach mastery. It is also what distinguishes the role of team coach from 'similar' roles such as consulting, teaching, training and facilitation.

3 Metaskills wrap around the heart of the TCS Team Coaching Wheel.

These are the highest-order skills that supercharge every aspect of team coaching. Metaskills transcend all other skills from the Greek word meta, meaning “after” or “beyond”. These three skills, **Presence**, **Use of Self** and **Active Experiments**, are essential to mastering the art of evoking awareness and provoking action and experimentation. Together, they provide the methodology for change.

Radiating out from the core of the TCS Team Coaching Wheel, 12 team coaching competencies sit within five clusters. These competencies set the foundations for a team coach's journey towards mastery.

The Team Coaching Wheel sits at the heart of our teaching, and they are fundamental to your development as a team coach.
